Summary

Motivated Computer Science undergraduate with experience building scalable AI-powered SaaS platforms, cybersecurity tools, and backend systems. Skilled in full-stack development, cloud deployment, and RESTful API design with hands-on expertise in AI integrations, automation, and real-time systems. Passionate about cybersecurity, AI agents, and rapid product development.

Experience

Backend Developer Intern, Fluencer Market (Remote) Dec 2024 – Apr 2025

- Developed RESTful APIs using Flask to support influencer-brand collaboration workflows.
- Reduced server latency by 35% through optimized query design and efficient data modeling.
- Collaborated with cross-functional teams to deliver scalable production-ready backend services.

Projects

ARTA — Autonomous Red Team Agent Apr 2026

FastAPI, Next.js, Gemini AI, SQLite, Puppeteer, Nmap, Metasploit

- Built an autonomous penetration testing pipeline using AI agents for recon, vulnerability analysis, exploitation, and reporting.
- Integrated real-time CVE detection via NVD API with sandboxed exploit validation.
- Developed a live monitoring dashboard using SSE in Next.js for scan tracking and findings visualization.

AstroRoni Sep 2025 – Apr 2026

Next.js, Supabase Auth, Flask, MongoDB, Razorpay, OpenAI, GCP

- Developed a full-stack astrology SaaS platform generating AI-powered Vedic Kundli and numerology reports.
- Integrated Razorpay payments and Supabase Auth for secure subscriptions and authentication.
- Designed scalable microservices deployed on Google Cloud Platform.

RiskRadar Nov 2024 – Apr 2025

Next.js, Kinde Auth, MongoDB, Stripe, Gemini AI, GCP

- Built a real-time CVE monitoring and vulnerability alert system.
- Used Gemini AI to generate prioritized remediation strategies for users.
- Implemented secure authentication, subscription billing, and scalable cloud deployment.

Technical Skills

Languages: JavaScript, TypeScript, Python, C++, Java, Rust, SQL, HTML, CSS

Frontend: React.js, Next.js, Tailwind CSS

Backend & Databases: Node.js, Flask, Spring Boot, Strapi, Supabase, MongoDB, SQL

Cloud & DevOps: Google Cloud Platform (GCP), Docker, Git

AI/ML & APIs: OpenAI API, Gemini AI, RESTful APIs

Tools: IntelliJ IDEA, Postman, Microsoft Office Suite

Achievements

MLH Hackathon — 1st Runner-Up 2026

- Built **NeighbourNet**, a mesh networking solution, showcasing rapid prototyping and strong problem-solving skills.

Winner — MLH Hackdays 2026

- Won MLH Hackdays by presenting **ARTA**, an AI-powered penetration testing system.

Frontend Hackathon — 2nd Place, West Bengal, India 2024

- Secured 2nd place among thousands of participants through strong UI/UX and frontend development skills.

Education

JIS College of Engineering, West Bengal, India

Bachelor of Technology in Computer Science

Jun 2025 – Present

- CGPA: 7.9/10
- Relevant Coursework: Data Structures & Algorithms, Operating Systems, OOP, DBMS
